

ABHILASH G

Cloud & Security Engineer — AWS — DevOps — Cybersecurity

abhilashg9113@gmail.com | +91 9113266202 | Bengaluru | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

MCA (Cybersecurity) graduate with production experience in cloud infrastructure, backend development, system security, and full-stack application design. Proven ability to architect scalable applications, implement CI/CD pipelines, debug complex systems, and optimize performance in real-world environments. Skilled in Python, Flask, Django, Linux, Docker, cloud technologies, and cybersecurity fundamentals. AIR 1353 out of 10,000+ in Coding Ninjas National Programming Contest.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, S3, RDS, Lambda, Route 53), Azure Basics, CI/CD Pipelines (GitHub Actions, Jenkins), Docker, Kubernetes, IAM, Network Security

Development: Python, Flask, Django, FastAPI, REST APIs, PostgreSQL, MySQL, MongoDB, Linux, Git/GitHub, Bash Scripting, Machine Learning (TensorFlow, Scikit-learn)

Cybersecurity: SOC Fundamentals, Vulnerability Assessment, Penetration Testing, Network Analysis, Secure API Design, System Hardening, Security Best Practices

WORK EXPERIENCE

Technical Intern

Mar 2026 – Jun 2026

Atom

- Architected and deployed full-stack applications using cloud infrastructure (AWS EC2, S3, RDS, Route 53); designed and implemented automated CI/CD pipelines with Docker containerization, improving deployment consistency, reducing manual overhead, and enabling faster release cycles across multiple environments.
- Debugged and resolved critical production issues spanning authentication, system configuration, and server-side failures; implemented comprehensive monitoring and observability solutions, optimized application performance, and tracked resource utilization across cloud infrastructure for cost efficiency.

Project Intern

Jan 2024 – Jun 2024

Hrutha Technologies

- Developed end-to-end machine learning solutions including model development, backend API integration, and Flask web interface; optimized model performance achieving 15% improvement in prediction accuracy through feature engineering and hyperparameter tuning on large-scale datasets.

KEY PROJECTS

IoT Security Research – Drone Network Vulnerability Analysis

Python, UDP,

Wireshark, Netcat

Analyzed real-world IoT vulnerabilities on Ryze Tello drone; identified critical flaw where drone accepts plain-text UDP commands without authentication.

AI-Powered University Assistant & Smart Campus Monitoring

Python, Flask, REST

APIs, Authentication

Built intelligent query handler with secure REST APIs and real-time monitoring backend.

Firewall Configuration Web App

Flask, Linux UFW

Automated Linux UFW firewall rules configuration; reduced manual errors by 40%.

Leaf Disease Detection System

Python, TensorFlow, CNN, Flask

Developed CNN model with Flask UI for plant leaf disease classification with 90%+ accuracy.

EDUCATION

Master of Computer Applications (MCA) – Cybersecurity	Oct 2024 – Jun 2026
Chanakya University, Bengaluru	CGPA: 8.06

Bachelor of Computer Applications (BCA)	Nov 2021 – Apr 2024
Government Science College Autonomous, Hassan	CGPA: 7.44

CERTIFICATIONS & ACHIEVEMENTS

- AWS Certified DevOps Engineer – Professional (DOP-C02) – Amazon Web Services (Jul 2026)
- AWS Cloud Practitioner Essentials – Amazon Web Services (May 2026)
- Introduction to Security Principles in Cloud Computing – Google (May 2025)
- Introduction to Cybersecurity – Cisco (Jun 2025)
- Introduction to Offensive Security with AI – Red Team Leaders (Feb 2026)
- AIR 1353/10,000+ – Coding Ninjas National Programming Contest (Top percentile)

LANGUAGES

- Kannada (Advanced)
- English (Fluent)
- Hindi (Intermediate)
- German (Beginner)
