

ABHILASH G

Cloud & Security Engineer | AWS | DevOps | Cybersecurity
abhilashg9113@gmail.com | +91 9113266202 | Bengaluru | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

MCA (Cybersecurity) graduate with production experience in AWS cloud infrastructure, backend development, and system security. Proven ability to deploy and manage scalable applications, implement CI/CD pipelines, and optimize cloud costs in real-world environments. Skilled in Python, Flask, Linux, Docker, and offensive security fundamentals. AIR 1353 out of 10,000+ in Coding Ninjas National Programming Contest.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, S3, RDS, Route 53), CI/CD Pipelines, Docker, IAM, Network Security, Firewall Configuration

Development: Python, Flask, Django, REST APIs, PostgreSQL, Linux, Git/GitHub, Bash Scripting

Cybersecurity: SOC Fundamentals, Vulnerability Assessment, Offensive Security, Network Analysis, Secure API Design

WORK EXPERIENCE

Technical Intern | Atom Mar 2026 – Jun 2026

- Architected and deployed production-grade applications on AWS using EC2, S3, RDS, and Route 53; built automated CI/CD pipelines with Docker containerization, reducing manual deployment overhead and improving release consistency across staging and production environments.
- Debugged and resolved critical production issues including authentication errors, time zone inconsistencies, and server-side failures; implemented monitoring solutions to track RDS performance, cloud resource usage, and cost optimization strategies in live environments.
- Configured and maintained AWS infrastructure components (IAM-based access control, security groups, Route 53 DNS); collaborated with engineering team on deployment best practices, testing protocols, and cloud cost reduction initiatives across multiple services.
- Performed full-stack application debugging and optimization including fixing responsive design issues, server errors, email template customization, and database query optimization; supported end-to-end deployment workflows and documentation.

Project Intern | Hrutha Technologies Jan 2024 – Jun 2024

- Developed machine learning models for a Planetary Defense Early Warning System using Python, TensorFlow, and Flask; improved prediction accuracy and reduced training time by 15% through optimized preprocessing and feature engineering.

KEY PROJECTS

IoT Security Research — Drone Network Vulnerability Analysis May 2026

- Analyzed real-world IoT security vulnerabilities using Ryze Tello drone as target device; implemented three attack approaches (Python UDP socket programming, Netcat packet injection, Wireshark traffic analysis) demonstrating practical offensive security techniques.
- Identified critical vulnerability: drone accepts plain-text UDP commands without authentication, exposing risks of unauthorized access and command injection; documented findings with demo video demonstrating IoT behavior, networking, and security implications.

AI-Powered University Assistant & Smart Campus Monitoring Oct 2025 – Jan 2026

- Built Python/Flask backend with intelligent query handling and real-time monitoring; designed secure REST APIs with authentication safeguards ensuring reliable data communication between system components.

Firewall Configuration Web App | Leaf Disease Detection System

- Designed Flask-based web app for automating Linux UFW firewall rules; reduced manual configuration errors by 40%. Developed CNN model with Flask UI for plant leaf disease classification (90%+ accuracy) with optimized deployment pipeline.

EDUCATION

Master of Computer Applications (MCA) — Cybersecurity Oct 2024 – Jun 2026

Chanakya University, Bengaluru | CGPA: 8.06

Bachelor of Computer Applications (BCA) Nov 2021 – Apr 2024

Government Science College Autonomous, Hassan | CGPA: 7.44

CERTIFICATIONS & ACHIEVEMENTS

- **AWS Cloud Practitioner Essentials** — Amazon Web Services (May 2026)
- **Introduction to Security Principles in Cloud Computing** — Google (May 2025)
- **Introduction to Cybersecurity** — Cisco (Jun 2025)
- **Introduction to Offensive Security with AI** — Red Team Leaders (Feb 2026)
- **AIR 1353/10,000+** — Coding Ninjas National Programming Contest (top percentile)
